BTEC Assignment Brief

Qualification	Pearson BTEC International Level 3 Certificate in Information Technology
	Pearson BTEC International Level 3 Subsidiary Diploma in Information Technology
	Pearson BTEC International Level 3 Foundation Diploma in Information Technology
	Pearson BTEC International Level 3 Diploma in Information Technology
	Pearson BTEC International Level 3 Extended Diploma in Information Technology
Unit number and title	Unit 24: Technical Fundamentals for Computing Professionals
Learning aim(s)	Learning aim C: Design a computer infrastructure solution
Assignment title	Design an infrastructure solution
Assessor	
Issue date	
Hand in deadline	

Vocational scenario or context	Your manager has reviewed the report you produced (Assignment 2) and has asked you to work on designing an infrastructure solution for the Derny-Designs Group Ltd project.
	Your manager has provided you with information to consider when producing your design (see information booklet).
Task 1a	Produce a plan for a computer infrastructure solution for Derny-Designs Group Ltd.
	The computer infrastructure solution must:
	be appropriate for installation in its new premises
	meet the key organisational requirements
	support staff in completion of their roles
	meet the needs of the business.
	Your plan should include:
	the design aims and requirements for the network
	network physical design schemes:
	o selection of a flat design and hierarchical designs (as appropriate to the identified requirements)
	o network diagrams and physical layout
	o LAN/WAN equipment requirements, e.g. server, switch, router
	o network client device requirements, e.g. devices to be used, peripherals

		 logical network design detailed specifications of devices to be used by staff in different roles (e.g. computer architecture,
		memory and storage, connection methods)
		details of any relevant legislative requirements for ensuring the security and privacy of data in relation to the network, connected devices and users.
Task 1b		Review your proposed infrastructure design with at least two other people.
		Keep a record of the feedback you receive and use this feedback to refine your design so that it better meets the needs of Derny-Designs Group Ltd.
Task 1c		Write a justification of the design decisions you have made, showing how they have helped ensure the planned infrastructure solution will meet the requirements identified in the scenario.
		Write an evaluation of the design process considering the effectiveness of the proposed infrastructure solution in comparison to alternatives, the reasons why your solution was chosen and the extent to which it meets the requirements in the scenario. Your evaluation needs to be supported by evidence from your work and reach supported conclusions.
Checklist of evidence required		 Design documents for an infrastructure solution Feedback on the documentation/designs collected from others
		Improved version of the documentation/design
		Written justification of design decisions
		Evaluation of the designs
Criteria cove	red by thi	s task:
Criteria reference	To achieve the criteria you must show that you are able to:	
C.D3	Evaluate the refined computer infrastructure design documents against the client requirements	
С.М3	Refine the computer infrastructure design in response to feedback justifying any changes made	
C.P4	Design a computer infrastructure solution to meet an organisation's needs.	
C.P5	Review the infrastructure solution design with others to identify potential improvements.
